

# Isabelle Sellon School

Happy New Year!

January 2021

## PHYSICAL EDUCATION AT PPK

As part of our school physical education program, all students will participate in outdoor winter skiing or snowboarding at our local ski hill, Pass Powderkeg following the February break! Our community ski hill wants all students to benefit from outdoor physical activity without additional financial burden to families. Families are encouraged to contact the school to make these arrangements with PPK or apply directly to Kidsport if needed.

Snowshoeing will not be an available option during this specific programming with PPK, but will be provided as a separate unit in PE classes.

We have consulted with Division office, Trustees, Parent Council and the staff at Pass Powderkeg to ensure preventative COVID safety measures are in place to permit participation this year. Please note, if further restrictions or closures result due to provincial regulations, this programming will be impacted.

Watch for specific information, such as dates, logistics and associated participation fees to be posted on our website and social media page in the upcoming weeks.

## TRICKSTER THEATRE NEWS

Back in the spring of 2019, our school applied for a Trickster Theatre Residency; along with a grant to fund this program from the Alberta Fine Arts. Our project was approved for funding, but was postponed due to COVID restrictions and school closures in 2020.

The Trickster Residency has been rescheduled to run May 3-7th, 2021. The core of the residency will operate as usual with classroom cohorts, but with safety measures in place, all pieces will be video taped and compiled into a final video show for digital release.

The theme for this residency is "We Can All Be Change Makers" and will examine the impact of positive change.

## MATH/SCI PROJECTS

Science and mathematics don't just belong in the classroom, they need to be applied to the world around us. This year ISS is participating in the Where Challenge, (<http://earthsciencescanada.com/where/>)

It provides an exciting opportunity for our students to investigate the origin and manufacturing process of an everyday item and communicate their knowledge creatively. Knowledge is the reward but as it is sponsored by Teck, the prizes are generous too.

We are also very excited to share that we are moving forward on an ISS student led community project to design and build a disc golf course for the Crowsnest Pass on a disused field. Watch this space to learn more and to hear how you can support our student's efforts. We hope to have it ready for summer. Yeeha! Mr. Crawford

## JANUARY KEY DATES

January 4-8th- online learning

January TBA- PPK sizing at the school

January 27th- 1Book5Schools Book title reveal and launch

January 29th- No School- PD Day

# WE ARE LOOKING FOR BUS DRIVERS!

## ARE YOU:

- A confident driver with a clean Driver's Abstract?
- Safety-oriented, dedicated, and punctual?
- Able to obtain a clean Police Intervention/Vulnerable Sector Check?
